Save on your meeting costs while helping  
save the planet. **Contact us for details**

Abundant natural daylight and ventilation, thanks to operable windows running the length of our buildings, minimize the need for artificial lighting. Additionally, 100% of the center's current electricity is from Puget Sound Energy's "green power" program, thereby reducing the center's energy load on the city's power grid.

We believe it is our social responsibility to reduce the environmental impact of the meetings we host wherever possible. We are committed to being a **green meeting and conference** venue and a responsible steward on behalf of a healthy Puget Sound. Make a difference by meeting at the Northwest Maritime Center.
